**DETAILED ACTION*****Drawings***

The drawings are objected to under 37 CFR 1.84(m) because solid black shading has been used in Figures 2-5. Figure 1 should be designated by a legend such as "Prior Art" because only that which is old is illustrated, MPEP 608.02(g). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: "Engine Management System".

***Claim Rejections - 35 USC § 102***

Art Unit: 3747

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 11, 13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Dixon et al. In paragraph [0014], Dixon et al discloses that the engine control system may use the cylinder pressure sensor output to determine crankshaft position of the engine. In paragraph [0016], it is disclosed that data is collected during the life of the engine which would inherently establish an operation history.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dixon et al in view of Wlodarczyk et al (WO 98/35210). Dixon et al does not disclose the type of sensor used, but in paragraph [0012] states they are well-known in the art. It would have been obvious to one with ordinary skill in the art at the time the invention was made to modify Dixon et al to use the deformable-type pressure sensor of Wlodarczyk et al, since it has been recognized in the art as suitable for use in an engine control system.

#### ***Allowable Subject Matter***

Art Unit: 3747

Claims 12, 14 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

The combustion pressure responsive systems made of record and not relied upon are considered pertinent to applicant's disclosure.
